CSS: Task-3

1. **HTML Setup:**
   - Define document structure with necessary HTML tags.
   - Set document title and link external stylesheet.

2. **Body Content:**
   - Create a div for image display with appropriate class.
   - Insert an image within the div.
   - Add a button for user interaction.

3. **CSS Styling:**
   - Give CSS such that the given section has equal spacing of 25% of the screen from left and right.
   - Keep spacing from top and bottom as 10% of the the screen
   - Customise button appearance with gradient background, font settings.
   - Use **Box Sizing** properly and the **page should not go in scroll.**
   - Use ViewPort units.

4. **Final Steps:**
   - Ensure proper tag closure in HTML.
   - Do not use **Flex**.
   - Do Not Use **Overflow:hidden**
   - Don't use position **relative** or **absolute**
   - Save HTML as `index.html` and CSS as `style.css`.
   - Place both files in the same directory.
   - Test webpage in browser for functionality and styling.

Submission Guideline :-
   - Deploy the File on Netlify as shown in the video.
   - If you don't know how to deploy on netlify, watch this video : https://youtu.be/Ii2Y4i4_i-o
   - Submit the Deployed Link below in the same task number
